formulation area

Dietopack: a flexible

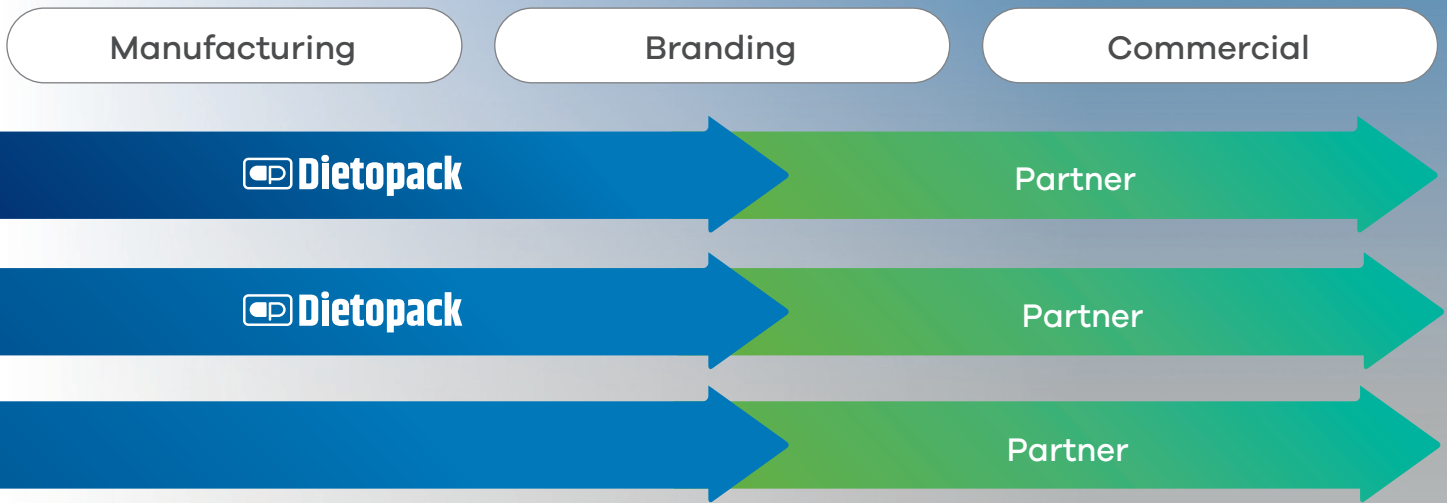

Dietopack is a full-service company, taking care of each stage: from ingredients selection, and product development right up to the manufacturing of the finished product, in the customer's desired form and packaging (CM Model).

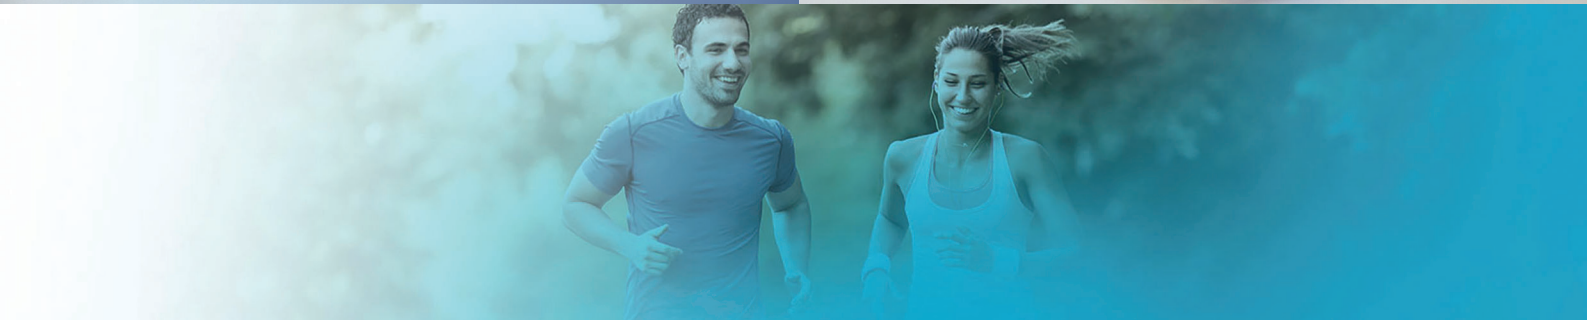

Additionally, as integrated CDMO service, Dietopack can offer opportunity to co-invest in the Customer's project starting from early-stage development (Co-Dev Model).

business model

Finally, Dietopack has developed a wide range of ready-to-market products in different therapeutic areas, that accelerate customer product ideation so they can focus effectively on marketing and sales (WL model).
